Dear Felicia Marcus, Chair, and Board Members of SWRCB:

SUBJECT: Save the Delta River with agritourism. "SAVE PARADISE, put in a parking lot?" (adapted from Joni Mitchell)? Fresh fruit and nuts, for USA are grown mostly from San Joaquin County (not valley). (USGS soil maps show Stanislaus and San Joaquin County as mediterranean subtropical soil; other 28 counties of Central Valley are already semi-arid, as in Hanford dune buggy riding).

OBJECTIVE: STOP DUST BOWL from destructive twin water tunnels under Delta River.

- KEY POINTS: HOW? DEVELOP ALTERNATIVES (5): 1/Recharge Ground water rights;
- 2/Renew Delta dredging;
- 3/Develop California desalination; with water tech business jobs; 4/Restore forestry with its dams;
- 5/Report Health data, both Norcal & Socal in drought damage (Note details.)
- 6/Protect Delta islands, with elected supervisors and representatives in five Delta River counties.

- I. Recharge GROUND WATER, water rights, in natural water cycle (NRCS.USDA.gov poster, 2012);
- II. Renew deep, pure Delta River DREDGING from Antioch to Sacramento, and water tech jobs; (a) stop reverse flow (100 year Delta River Levee maps, usace.army.mil.) (b) Dredging purifies the water with soil absorption and aeration (Late A. Mohammad, basic engineer who did dredging with all the Delta islands).
- III. Develop California DESALINATION, with 27 testing points (US Senator D. Feinstein, 2015); (a) foster business jobs (north and south, like in Bakersfield Basin), (b) applied as do Navy ships, California coast, with alternate energy; (c) used in 100 nations (invented with J. Leibovitz, Ph.D., at UCB, 1970; (d) gain twice as much water (archives, restorethedelta.org, 2015). (e) Promote DESALINATION along with WATER TECH business jobs (not just bureaucratic appointments for water district fees).
- IV. Restore forestry, protect natural reservoirs and former dam investments.
- V. Report HEALTH DATA for green, CALIFORNIA, with 50% food crops for USA and for healthier air (oxygen) versus increased drought with salt to soil, dust to allergies, etc. (Riverside County research; 2016).

VI. Protect Delta islands, under elected leadership of local supervisors of Five Delta Counties

CLINCH: PROMOTE PROSPERITY with Delta agri-tourism and food crops.

CLOSE: Stop waste of unending \$15 billion of taxpayer monies for destructive concrete twin water tunnels under the Delta River. This does not count losses of productive livelihoods in Delta agri-tourism with aquatics and healthier air with green crops. Stop reverse flows, with increased soil salinity, making more drought and health problems.

Sincerely,

Jacki Lauchland Shaw Ed D. Zip Grower Lodi CA part of Delta Loop (but not on Delta

Currently #1 wine region in the world from generational families in productive research hours (ldgga.org, sjfb.org and others) .

P.S. Did LA Metro Water prove trustworthy with Owens Valley Agreements? We went to SWRB meetings at EPA building. Contrary to press releases, testimonials did not report that it was Ok to have less water in NorCal. California has 9000 miles of ocean for desalination, like Navy ships operate. The CVFCB/Flood at Clarksburg workshops, 7/20/15) reported 80% non-compliance in deep pure Dredging (from Antioch to Sacramento). USACE funds were sent to Washington State (Sacramento Bee, 2014). Refund San Joaquin-Sacramento Delta River Dredging from Antioch Bay to Sacramento (with 100 year USACE maps).

NOTE: My husband passed away from breathing complications with drought in Delta Loop, Lodi, CA 95242. Respectfully, stop ignoring or neglecting cost effective solutions.

Jacklyn Shaw For over 100 years, Delta Loop with Lodi, CA 95242, has been losing ground water to Oakland via Pardee Reservoir ("Pardee", wikipedia, 2014). Now, betwixt and between, the loss is for soil salinity by reverse blows with Delta River neglect. For pragmatism (common sense), develop alternatives to Delta River destruction by any humongous twin water tunnels, under the Delta River of Sacramento and San Joaquin Counties. Note solutions: 1/Recharge Ground WATER RIGHTS 2/ Renew deep, pure Delta River DREDGING from Antioch to Sacramento; 3/Develop 27 testing points for California DESALINATION (North and South drought); 4/Restore Forestry; 5/Report HEALTH data, like towards itchy peat dust for hot, dusty breeze t(o Sacramento Capitol complex); 6/Protect Delta islands with elected five supervisors and/or local representatives of FIVE DELTA COUNTIES. Feedback please. Thank you, Jacklyn Shaw, Ed D., Zin Grower, Lodi, CA 95242, part of the Delta Loop (about one

My name is Prof. Jacki Lauchland Shaw, Zin Grower . . .

Thanks for the SWRCB website pictographs on ground water. We need more headings pointing the way to most effective or proven California water solutions.

For over 100 years, with Lodi, CA, near the DELTA LOOP has been losing ground water. That is due to NorCal drought and to Oakland via Pardee Reservoir ("Pardee", wikipedia, 2014). Now, the loss is for SOIL SALINITY by reverse flows with Delta River neglect.

For pragmatism (or common sense), develop productive alternatives to Delta River destruction, that is, in any horrifying twin water tunnels (40 foot wide, 40 miles), under the Delta River of Sacramento, San Joaquin and other Delta Counties.

To your website and news releases, please add headings and maps with heritage towns in practical solutions:

1/Recharge Ground WATER RIGHTS: Avoid six undesirable results, by Brewster: like land subsidence and earthquakes.

[Six: surface water depletion; storage reduction; degraded quality; seawater intrusion; land subsidence (earthquakes); and GW Levels lowering.]

2/ Renew deep, pure Delta River DREDGING from Antioch to Sacramento (with 100 Year Maps, USACE.gov) [it has been at 80% non-compliance.]

3/Develop 27 testing points for California DESALINATION (North and South drought, with US Senator, Feinstein); *IT WAS INVENTED at UCB + used in 100 nations*

4/Restore RESERVOIRS with FORESTRY (redwood trees died -- in drought and fires; common news ;

5/Report NorCal HEALTH data, increased allergies and deaths with more hot, dusty breeze (FIVE DELTA COUNTIES) Riverside County . . .);

6/Protect Delta ISLANDS with elected five supervisors and/or local representatives with FIVE DELTA COUNTIES (sjcgov.org).

7/For Delta counties, Unending Fix it costs need to include FINANCIAL LOSSES, of contributing livelihoods with Delta agri-touism

(that is, from three inch Delta smelt to 30 inch salmon to yes, 66 inch area residents:

growers. farmers, tour agents, restaurant owners and other businesses and community groups)

8/In 1982 informed Californians voted against any damaging peripheral canals to the Delta.

X

(9) IS HISTORY AND HERITAGE ^{of Delta Loop towns} ON THE SWRCB WEBSITE AND PRESS RELEASES?

Thank you for this opportunity to clarify our alarm to ^{that} the Fix It and our concerns to include these proven observations and solutions. ~~###~~

QUESTIONS
*Detailed Notes:

Here are further questions on need for website headings:

(A) Delta Islands: Is Delta Loop and Norcal denied sustainability when LA Metro of SoCal has power to conflict the waterways?

Did LA Metro Water prove trustworthy with Owens Valley Agreements?

(B) NorCal residents of various concerns, scientists, etc. — participated in SWRB meetings at EPA building, speaking against added water restrictions in NorCal drought.

Contrary to press releases statewide, testimonials did NOT report that it was Ok to have less water in NorCal. Please correct these for oversight.

California has 9000 miles of ocean for desalination, like Navy ships operate. The CVFCB/Flood at Clarksburg workshops, 7/20/15 reported 80% non-compliance in deep pure Dredging (from Antioch to Sacramento).

USACE funds were sent to Washington State (Sacramento Bee, 2014). (Advocate funding for San Joaquin-Sacramento Delta River Dredging from Antioch Bay to Sacramento, (with 100 year USACE maps).

NOTE: My husband passed away from breathing complications with drought in Delta Loop, Lodi, CA 95242. Respectfully, stop ignoring or neglecting cost effective solutions.

~~instead of financial losses~~
